THE GAP

What does *Carmen* know that your AI doesn't?

FOR YOUR PEOPLE

What every employee needs to know

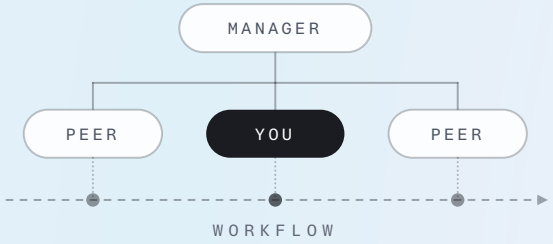

EMPLOYEE

01

Teams, roles, and workflows

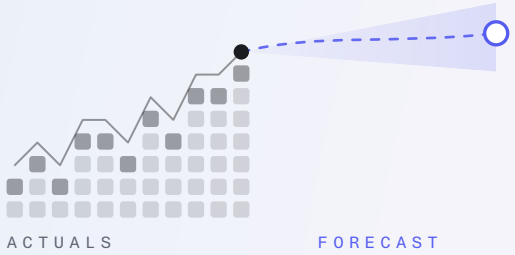

Who owns this?

02

State and actions of the business

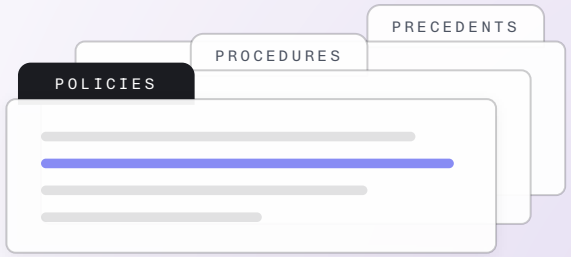

What's happening now?

03

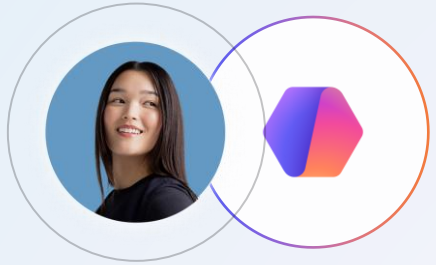

Curated knowledge

How should we handle it?

THE RAMP-UP PROBLEM

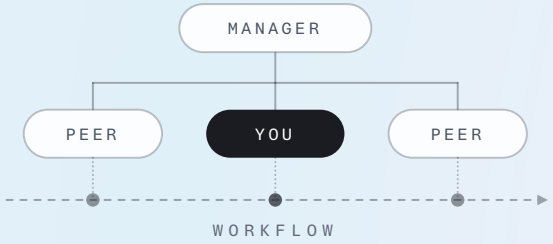

Your agents don't have 20 years

01

Teams, roles, and workflows

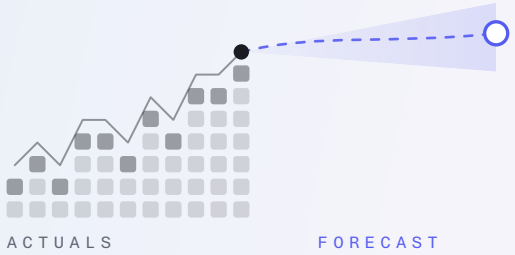

Who owns this?

02

State and actions of the business

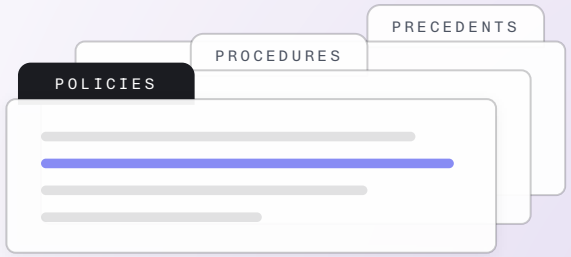

What's happening now?

03

Curated knowledge

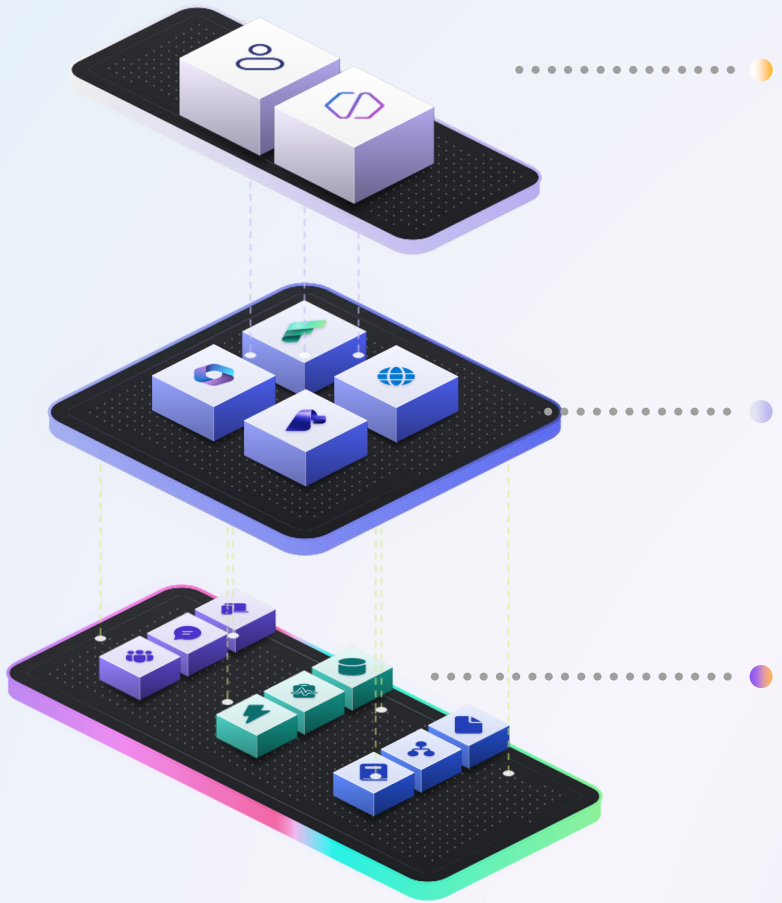

How should we handle it?

A SHARED INTELLIGENCE LAYER

Your people. Your agents. Your IQ.

One understanding of your work, data and knowledge, *shared by your people and your agents.*

01

People + Agents

FROM INTERACTIVE
TO AUTONOMOUS

02

Microsoft IQ

THE INTELLIGENCE LAYER
FOR PEOPLE AND AGENTS

03

Your Context

- Teams, roles, and workflows
- State and actions of the business
- Curated knowledge

WHERE YOUR CONTEXT LIVES

Microsoft IQ Platform

Unified intelligence for enterprise AI

Work IQ

How you get work done

Context on people and live business operations

Fabric IQ

How your business operates

Context on enterprise data and business analytics

Foundry IQ

How your agents unlock knowledge

Context on policies, authoritative documents, and knowledge bases

Web IQ

How you connect to web intelligence

Context from the web, news, images and video

PUBLIC PREVIEW

Business Applications in Work IQ

Put the business knowledge in your apps to work

01

Connected context

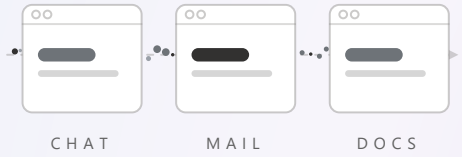

Without moving your data

02

Compounding intelligence

Richer as your business runs

03

In the flow of work

Wherever your people work

From finding answers to moving work forward.

Shared business context, *within the permissions and controls your organization sets.*

01

Human + Copilot + Agents

A HUMAN-LED,
MULTI-AGENT TEAM

02

Work IQ + Fabric IQ

THE INTELLIGENCE LAYER
FOR COPILOT AND AGENTS

03

PRODUCTIVITY DATA

Microsoft 365 apps

BUSINESS DATA NEW

Dynamics 365 and Power Platform apps

ANALYTICAL DATA

Work IQ

The intelligence layer for Copilot and agents

Business Apps in Work IQ

Dataverse + connectors

System of Record — data layer
(Dynamics 365, Power Apps
and the apps you already use)

01 Business Understanding

Extends AI reasoning and retrieval to business data and business processes across Dynamics 365 and Power Apps.

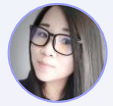

02 Business Skills

Empowers agents with scalable, repeatable execution by encoding cross-system processes as reusable, versioned skills any agent can invoke.

Work IQ isn't just for you.

It's a platform to build agents.

FOR YOU

Copilot

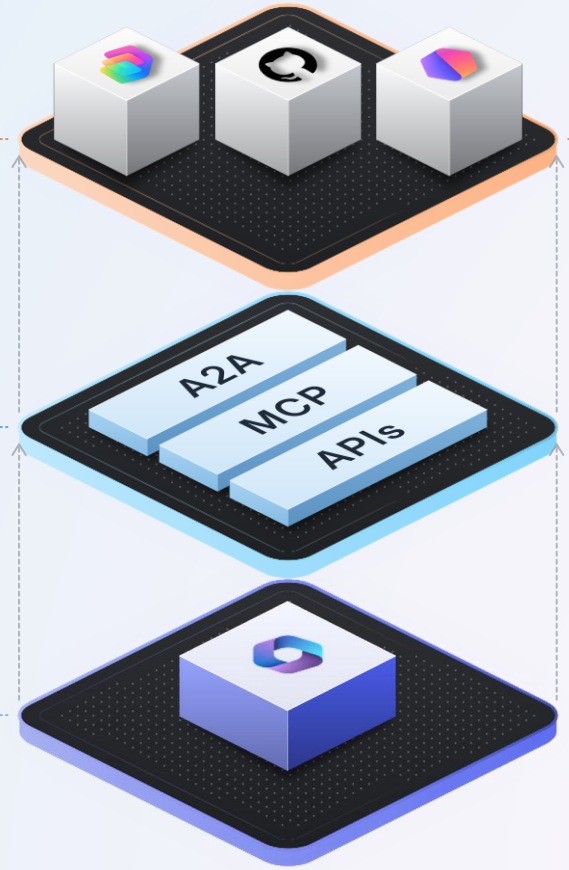

Built in, where your people work.

OPEN PROTOCOLS

A2A MCP APIs

Work IQ

The intelligence layer for Copilot and agents

YOUR AGENTS

Copilot Studio

Work IQ as a native tool.

GitHub Copilot

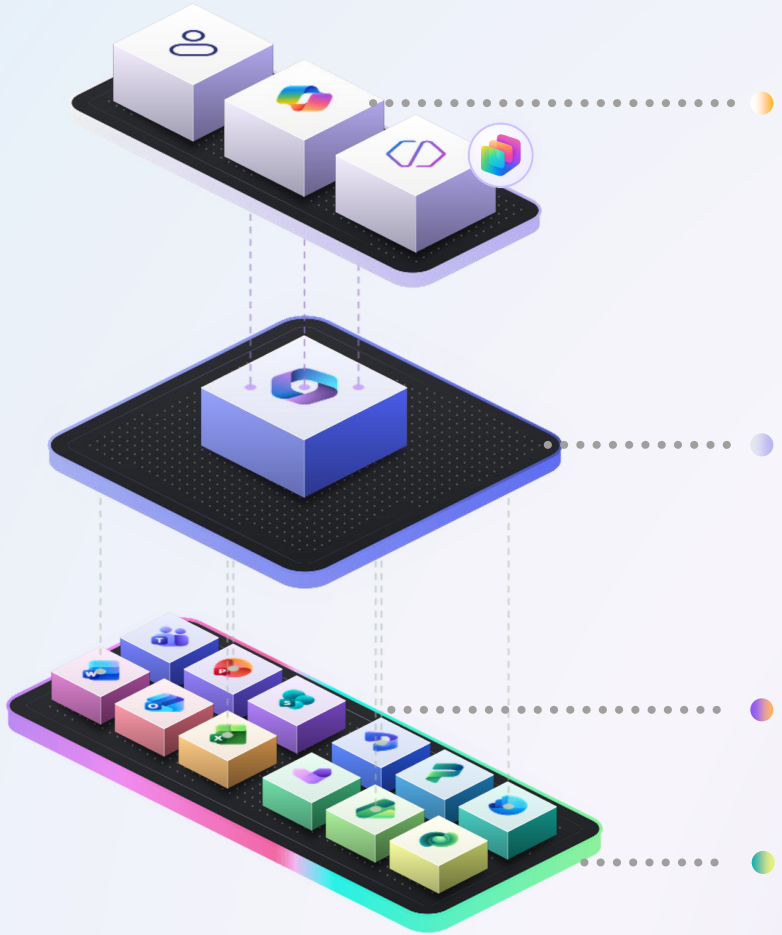

Work IQ and Dataverse plugins.

Custom agents

Work IQ APIs, any protocol.

One Team
One Intelligence

You, Copilot and your agents share *the same data, understanding and permissions.*

01

Human + Copilot + Agents

A HUMAN-LED,
MULTI-AGENT TEAM

BUSINESS DATA

Dynamics 365 and Power Platform apps

04

Agent 365

THE CONTROL PLANE
FOR ALL YOUR AGENTS

PROOF POINTS

Why build on Work IQ.

INTELLIGENT

Knows how work happens

Semantic index, memory and skills, not raw search. Agents discover what data exists and how it is organized.

600 TB+

of context in an average Fortune 500 tenant

SCALABLE

One runtime, org-wide

Ten generic tools replace hundreds of operations, built for continuous, high-frequency agents.

80% fewer

tokens, and 2x faster, than traditional APIs in testing

SECURE

Data stays in place

Every call is user-scoped, policy-checked and logged. Agents see only what their identity is allowed to see.

In tenant

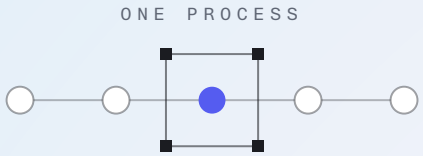

context, memory and workspaces never leave your boundary

IF YOU'RE A BUILDER

DON'T START WITH

~~*"What agent should I build?"*~~

Put the business knowledge you already have to work.

01

Start with a piece of work

Pick one process that matters to your business.

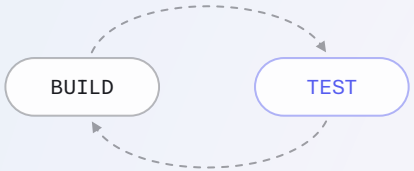

02

Understand, follow, act

What does the agent need to understand?

What process does it need to follow?

What should it be allowed to do?

03

Build and test

Build from your data, apps, processes
Test with the people who do the work

04

Your *agent*

CUSTOMER STORY

Agentic Sales at EY

"The model wasn't the obstacle, *the process was.*

Sharad Bajaj

VP of Engineering
Microsoft

Erick Kirchner

Assistant Director
Client & Industries at EY

WHAT YOU'VE SEEN TODAY

The opportunity is to make that understanding available to agents.

PERMISSIONS & CONTROLS

01

Copilot and agents

Find information

ANSWER THE QUESTION

Help move work forward

TAKE THE NEXT STEP IN THE PROCESS
